

TEAM EOD SUMMARY

House Price Prediction Project

Team	Team A
Date	07 September 2026
Total Members	6
Tasks Assigned	Data preparation, EDA, visualization, model training, application development, documentation, and presentation
Tasks Completed	Dataset cleaning, exploratory analysis, visualizations, Linear Regression model, evaluation, prediction application, README, and final PowerPoint presentation
Tasks In Progress	Understanding the workflow between model_training.py and app.py; reviewing model integration
Tasks Pending	Final team review, presentation practice, and submission verification
Blockers	Unable to fully understand how model_training.py works and how the prediction flow in app.py operates. Additional explanation and walkthrough are required.
Files Submitted	EDA.py, Arranging data.py, data_visualization.py, model_training.py, app.py, datasets, model files, metrics, visualizations, README.md, and final PowerPoint presentation

The team is encouraged to work collaboratively, communicate progress regularly, and ensure that every member understands their assigned task and contribution.

Regards,

RIHAN KANI
